Interpreting Initial Validation Report and Final Validation Report

The Initial Feedback Report and the Final Validation Report follow the same format. Each report begins with a header that displays general information. The Final Validation header is followed by a report detail section that describes each error encountered in any of the file records. The items on each line are tab delimited. The format of the validation reports are as follows:

MDS Initial Feedback Report

CMS STATE REPORT MDS INITIAL FEEDBACK REPORT

[Report Date/Time]	mm/dd/yyyy hh:mm:ss
[Submission Method]	upload
[Edit Specs. Version]	1.30
[Batch Status]	XXXXXXXXX
[Submission Date/Time]	mm/dd/yyyy hh:mm:ss
[Submission Batch ID]	9999999999
[Batch Submission Type]	xxxxxxxxxx
[Facility ID]	xxxxxxxxxxxxxxxxxx
[Facility Name]	xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
[# Data Records Processed]	99999

MDS Final Validation Report

CMS STATE REPORT MDS FINAL VALIDATION REPORT

[Report Date/Time]	mm/dd/yyyy hh:mm:ss
[Edit Specs. Version]	1.30
[Batch Status]	XXXXXXXXXX
[Submission Date/Time]	mm/dd/yyyy hh:mm:ss
[Submission Batch ID]	9999999999
[Batch Submission Type]	xxxxxxxxxx
[Facility ID]	xxxxxxxxxxxxxxxxxx
[Facility Name]	xxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxxx
[# Records Processed]	99999
[# Records Rejected]	99999
[# Duplicate Records]	99999
[# O_OO Records]	99999
[# Records with Messages]	99999
[Total # of Messages]	999999

Record: Header

[Field or MDS Items]	xxxxxxxxxx

Record Type Definitions

The following structured logic defines MDS 2.0 Record Types:

RECORD TYPE	DEFINITION MATRIX
A	WHERE (AA8a = 01) AND (AA8b = SPACE)
AM	WHERE (AA8a = 01) AND (AA8b = 1 OR 5 OR 7 OR 8)
AO	WHERE (AA8a = 01) AND (AA8b = 6)
Y	WHERE (AA8a = 02) AND (AA8b = SPACE)
YM	WHERE (AA8a = 02 OR 03 OR 04) AND (AA8b = SPACE)
YO	WHERE (AA8a = 02 OR 03 OR 04) AND (AA8b = 6)
Q	WHERE (AA8a = 05 OR 10) AND (AA8b = SPACE)
QM	WHERE (AA8a = 05 OR 10) AND (AA8b = 1 OR 2 OR 3 OR 4 OR 5 OR 7 OR 8)
QO	WHERE (AA8a = 05 or 10) AND (AA8b = 6)
O	WHERE (AA8a = 00) AND (AA8b = SPACE)
OM	WHERE (AA8a = 00) AND (AA8b = 1 OR 2 OR 3 OR 4 OR 5 OR 7 OR 8)
OO	WHERE (AA8a = 00) AND (AA8b = 6)
D	WHERE (AA8a = 06 OR 07 OR 08) AND (AA8b = SPACE)
R	WHERE (AA8a = 09) AND (AA8b = SPACE)
X	WHERE (AT2 = 2)

Report Field	Description	Values
[Report Date/Time]	The date and time the report was generated by the MDS system.	Date and time to the nearest second
[Edit Specs. Version]	The data specifications version that the State MDS System is currently using.	Current Version Number
[Submission Method]	The application that was used to submit a facility's files into the MDS system. If the facility connects to the State agency to submit files, then the submission method would be "Upload."	"Upload"
[Batch Status]	Indication of whether the submitted batch was received successfully or rejected. While most records with errors are accepted and stored in the MDS database, any fatal errors encountered by the MDS system will result in the rejection of the entire batch of records. A list of fatal errors is provided following this table.	"Received" or "Rejected"
[Submission Date/Time]	The date and time the MDS submission was uploaded to the State server by the LTC facility.	Date and time to the nearest second.
[Submission Batch ID]	A unique identification number for this submission.	Integer
[Batch Submission Type]	Indication of whether this submission is a test or production submission.	"Test" or "Production"
[Facility ID]	A unique identifier for the facility that created the MDS records in the submission.	Alphanumeric
[Facility Name]	The name of the facility that created the MDS records in the submission.	Text
[# Records Processed]	Total number of records processed in this submission.	Integer (zero or greater)
[# Records Rejected]	Total number of records that were not loaded into the database because of errors in the record.	Integer (zero or greater)
[# Records Duplicated]	Total number of records that were not loaded into the database because they were duplicate records.	Integer (zero or greater)
[#O_OO Records]	Total number of records that were not loaded into the database because AA8a=00 and AA8b=6.	Integer (zero or greater)
[# Records with Messages]	The number of records that had errors but were loaded into the database.	Integer (zero or greater)
[Total # Messages]	Number of errors in all records in the submission.	Integer (zero or greater)
Record: XX	The record in the MDS file that the errors below are being reported for.	Header, Trailer, or a number (indicating the record number)
Assmt_Int_ID	The unique number assigned each assessment in the state database.	Integer
[SSN]	Social Security Number	xxx-xx-xxxx
Name	Last name, first name, and middle initial of the resident the assessment record refers to	Text
(Record Type)	The type of MDS data contained in the record (See page 4 for record type definition)	A, AM, Y, YM, Q, QM, D, R, O, OM, 00, X
(Effective Date)	The effective date of the record (R4 for a discharge record, A4a for a reentry record, and R2b for all other record types)	Date value
(Target Date)	The target date of the record (R4 for a discharge record, A4a for a reentry record, and A3a for all other record types).	Date Value
(Record Status)	Indicates whether the record was accepted successfully and stored in the MDS database or rejected.	"Accepted" or "Rejected"
(Res_Int_ID)	A unique identification number for this resident.	Integer

Table 1-1. Report Field Descriptions and Values

Report Field	Description	Values
AA8a=xx, AA8b=x	Actual value submitted for fields AA8a and AA8b.	AA8a=00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 10 AA8b=Blank, 1-8
AT2	Actual value submitted for AT2	Blank, 1, 2
Attestation Date AT6	The AT6 date of the record.	Date value
Field or MDS Item	The code for the field in error	Form location code
Invalid Data Submitted	Actual value submitted	(varies)
Message Number	The number used to identify the error that was encountered for the corresponding record. This number and the error message associated with it can be found in the error message tables of the <i>MDS System Administration Manual</i> and the list of errors following this table.	Negative integer
Message	Text information about the error that was encountered for the corresponding record.	Text

Table 1-1. Report Field Descriptions and Values

Messages and Descriptions

The following errors are considered *fatal file* errors and will result in the rejection of the entire submission batch. If a submission file contains a fatal file error, MDS-Main.exe is never executed for the submission and the individual data records are not validated or stored in the database.

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-1	Invalid FAC_ID: The State-assigned Facility ID code (FAC_ID) in the header record of the submission file does not match the FAC_ID that corresponds to the Login ID (User Name) used.	<p>Cause:</p> <ul style="list-style-type: none">* The wrong file was submitted.* The State-assigned Facility ID Code (FAC_ID) in the header record of the submission file does not match the FAC_ID that corresponds to the Login ID (User Name) used. <p>Example:</p> <ul style="list-style-type: none">* Parent company submitting for multiple facilities and forgot to change facility identifiers for each new facility. <p>Action:</p> <ul style="list-style-type: none">* Verify that the correct file was submitted.* Verify that the facility ID in the header record of the submission file and the Login ID correspond. If they do not correspond, check the facility encoding software.
-4	Header missing: The required header record is missing from the submission file.	<p>Cause:</p> <ul style="list-style-type: none">* The header record is missing from the submission file.* The REC_ID is invalid for the header. <p>Definition:</p> <ul style="list-style-type: none">* Header record: The header record contains basic identifying information for the facility, as well as, contact persons and telephone numbers to use in the event that the file is in error. It is the first line of data in the submission file.* REC_ID: Identifies the line in the file as a header record, data record, or trailer record. Header record is identified by "A0," upper case A followed by a zero in the first two bytes. <p>Action:</p> <ul style="list-style-type: none">* Verify that the header record is in the submission file. Refer to the current data specifications for the correct submission file layout.* Verify that the header REC_ID is "A0."* Contact your software vendor for assistance.

Table 1-3. Fatal File Message

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-5	Header incorrect length: The header record of the submission file is not the correct length.	<p>Cause:</p> <ul style="list-style-type: none"> * The header record of the submission file is not the correct length. * Transmission may have been interrupted (i.e. power surge, lightening strike) <p>Definition:</p> <ul style="list-style-type: none"> * Header record: The header record contains basic identifying information for the facility, as well as, contact persons and telephone numbers to use in the event that the file is in error. It is the first line of data in the submission file. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the header record in the submission file is 1814 bytes in length. Refer to the current data specifications for the correct submission file layout. * If you think the transmission was interrupted, attempt to resubmit file. * Contact your software vendor for assistance.
-7	Data record incorrect length: The resident data record of the submission file is not the correct length.	<p>Cause:</p> <ul style="list-style-type: none"> * The resident data record of the submission file is not the correct length. * Transmission may have been interrupted. (i.e. power surge, lightening strike) <p>Definition:</p> <ul style="list-style-type: none"> * Data record: A data record contains information for a single MDS resident record, a single discharge transaction, a single reentry transaction (readmission after discharge), a single request to modify an MDS record, or a single request to inactivate an MDS record. There will be one or more data records in a submission file. <p>Action:</p> <ul style="list-style-type: none"> * Verify that each data record of the submission file is 1814 bytes in length. Refer to the current data specifications for the correct submission file layout. * If you think the transmission was interrupted, attempt to resubmit file. * Contact your software vendor for assistance.

Table 1-3. Fatal File Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-8	Data Records missing: No resident data records are found in the submission file.	<p>Cause:</p> <ul style="list-style-type: none"> * There were no resident data records in the submission file. * This error will also occur if the REC_ID is invalid for the data record. <p>Definition:</p> <ul style="list-style-type: none"> * Data record: A data record contains information for a single MDS resident record, a single discharge transaction, a single reentry transaction (readmission after discharge), a single request to modify an MDS record, or a single request to inactivate an MDS record. There will be one or more data records in a submission file. * REC_ID: Identifies the line in the file as a header record, data record, or trailer record. Header record is identified by "A0," upper case A followed by a zero in the first two bytes. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the submission file contains at least one resident data record. * Verify that the data record REC_ID is "B0," "M0," or "X0." Refer to the current data specifications for the correct submission file layout. * Contact your software vendor for assistance.
-9	Trailer incorrect length: The trailer record of the submission file is not the correct length.	<p>Cause:</p> <ul style="list-style-type: none"> * The trailer record of the submission file is not the correct length. * Transmission may have been interrupted. (i.e. power surge, lightening strike) <p>Definition:</p> <ul style="list-style-type: none"> * Trailer record: The trailer record indicates the end of the submission file and includes a count of the total number of records in the file including the header and trailer records. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the trailer record of the submission file is 1814 bytes in length. Refer to the current data specifications for the correct submission file layout. * If you think the transmission was interrupted, attempt to resubmit file. * Contact your software vendor for assistance.

Table 1-3. Fatal File Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-10	Trailer missing: The required trailer record is missing from the submission file.	<p>Cause:</p> <ul style="list-style-type: none"> * The required trailer record is missing from the submission file. * The REC_ID is invalid for the trailer record. <p>Definition:</p> <ul style="list-style-type: none"> * Trailer record: The trailer record indicates the end of the submission file and includes a count of the total number of records in the file including the header and trailer records. * REC_ID: Identifies the line in the file as a header record, data record, or trailer record. Trailer record is identified by "Z0," upper case Z followed by a zero in the first two bytes. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the trailer record is in the submission file. * Verify that the data record REC_ID is "Z0." Refer to the current data specifications for the correct submission file layout. * Contact your software vendor for assistance.
-11	Incorrect record count: The submission file contains MORE records than the trailer record indicates.	<p>Cause:</p> <ul style="list-style-type: none"> * The number of records in the submission file is more than the trailer record indicates. <p>Definition:</p> <ul style="list-style-type: none"> * Trailer record: The trailer record indicates the end of the submission file and includes a count of the total number of records in the file including the header and trailer records. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the trailer record count equals the total number of the data records plus two (one for the header record and one for the trailer record) * Contact your software vendor for assistance.
-12	Incorrect record count: The submission file contains FEWER records than the trailer record indicates.	<p>Cause:</p> <ul style="list-style-type: none"> * The number of records in the submission file is less than the trailer record indicates. <p>Definition:</p> <ul style="list-style-type: none"> * Trailer record: The trailer record indicates the end of the submission file and includes a count of the total number of records in the file including the header and trailer records. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the trailer record count equals the total number of the data records plus two (one for the header record and one for the trailer record) * Contact your software vendor for assistance.

Table 1-3. Fatal File Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-18	Invalid Submission Type: The header record does not correctly indicate whether this is a test or production submission file.	<p>Cause:</p> <ul style="list-style-type: none"> * The TEST_SW (test/production indicator) in the header record of the submission file was not a 0 (zero) or a 1. When invalid data is submitted in the TEST_SW field, the CMS MDS System at the State checks only the header record for errors and rejects the file. <p>Definition:</p> <ul style="list-style-type: none"> * TEST_SW: Item that designates the submission file as a test or production file. "0" (zero) indicates test, and "1" indicates production. Any other response is invalid data. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the TEST_SW in the header record of the submission file is "1" or "0". * Contact your software vendor for assistance.

Table 1-3. Fatal File Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-102	Extra data: The submission file contains extra data after the trailer record	<p>Cause:</p> <ul style="list-style-type: none"> * The submission file contains extra data after the trailer record, which is to be the last record in the file. <p>Definition:</p> <ul style="list-style-type: none"> * Trailer record: The trailer record indicates the end of the submission file and includes a count of the total number of records in the file including the header and trailer records. <p>Action:</p> <ul style="list-style-type: none"> * Verify that there is no data following the % (percent sign) in the trailer record of the submission file. * Contact your software vendor for assistance.
-103	Unable to accept file: An error has occurred while inserting a row in the MDS_upload table in the CMS MDS system. Contact your system coordinator immediately before resubmitting the file.	<p>Cause:</p> <ul style="list-style-type: none"> * There is a problem at the CMS MDS system at the State. A database error occurred when updating the MDS_upload table. <p>Action:</p> <ul style="list-style-type: none"> * If this message is received, contact your State Coordinator immediately. Resubmit this file when directed by your State Coordinator.

Table 1-3. Fatal File Messages (cont'd)

The following errors are considered *fatal record* messages and will result in the rejection of individual records. Assessments that have fatal record errors are not stored in the database (for data integrity purposes).

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-27	Date is missing/invalid: This required date (MDS Item Above) is either missing or contains an invalid date for the submitted record.	<p>Cause:</p> <ul style="list-style-type: none"> * The identified date for the submitted record is either missing or invalid. * If required on the record submitted, this message applies to the following date items: <ul style="list-style-type: none"> *R2b (MDS Completion date) *R4 (Discharge Date) *A4a (Reentry Date) <p>Definition:</p> <ul style="list-style-type: none"> * Invalid for the purposes of this message means that the date must contain a valid month, day, and year. A month of 40 or a day of 32 is not valid. <p>Tip:</p> <ul style="list-style-type: none"> * The correct submission file format for all dates is "YYYYMMDD." The date submitted will display on the Final Validation Report the way it is in the submission file. If it is submitted in the file as "MMDDYYYY," it will be displayed this way on the Final Validation Report, indicating the reason for the message. This may mean your software vendor needs to be notified. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the effective date is not blank. * If the effective date is not blank, verify that the date entered in the record has a valid month, day, and year. * Make appropriate corrections to the record and resubmit.
-28	Invalid AA8a/AA8b combination: This submitted record does not contain a valid reason for assessment combination.	<p>Cause:</p> <ul style="list-style-type: none"> * This record does not contain a valid combination in items AA8a (primary reason for assessment) and AA8b (special care code). <p>Example:</p> <ul style="list-style-type: none"> * An example of an invalid combination is AA8a = 9, AA8b = 5 <p>Action:</p> <ul style="list-style-type: none"> * Make appropriate corrections to the record and resubmit. * Refer to the LTC RAI User's Manual for item-by-item instructions for the MDS * Refer to the record type definition matrix in the current data specifications for valid combinations.

Table 1-4. Fatal Record Messages

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-29	Invalid data value: The submitted data for this item(s) is/are not in the valid range of acceptable values.	<p>Cause:</p> <ul style="list-style-type: none"> * This message can occur for any MDS item submitted with data not in the valid range of acceptable values. * The submitted data for this item(s) is not in the valid range of acceptable values * Face sheet items (Section AB and AC) follow the all or none rule. * This error will occur if the SSN is all "0" or "9." * The SSN must meet the following range: <ul style="list-style-type: none"> 1) If first character is numeric, the length must be 9 and all numeric. 2) If first character is alphabetic, the characters starting with the third position must be all numeric. 3) All dashes or spaces are accepted, but embedded dashes or spaces are not. <p>*This error will occur if an out of range value is submitted in the SUB_REQ field. Valid values are 1, 2, or 3.</p> <p>Definition:</p> <ul style="list-style-type: none"> * <i>"All or none rule"</i> pertains to face sheet Sections AB and AC as follows: <ul style="list-style-type: none"> • If AA8a = 01, all items AB1 through AC1y must be completed with valid values. • If AA8a = 08, AB1 and AB2 must be completed. Items AB3 through AC1y are optional by facility option. If facility option is chosen, AB3-AC1y, they must be submitted according to one of three patterns: all items AB3-AC1y, none of the items AB3-AC1y, special pattern where all of AB5a-f are present with none of the other AB3 through AC1y. • For rec type Y, YM, YO, Q, QO, R, and D where AA8a = 06, 07, AB5a-f can be submitted alone, if any fields other than AB5a-f are submitted, all items must be submitted; or none of the items AB1 through AC1y are submitted. • For AA8a = 00, 05, 10, and AA8b = 1, 2, 3, 4, 5, 7, 8; AB5a-f can be submitted alone. If any fields other than AB5a-f are submitted, all items must be submitted; or none of the items AB1 through AC1y are submitted. <p>Action:</p> <ul style="list-style-type: none"> * Make appropriate corrections to the record and resubmit. * Refer to the LTC RAI User's Manual for item-by-item instructions for the MDS. * Refer to the current data specifications for this item to determine acceptable values.
-31	Incorrect format: The submitted data for this item is not in the correct format.	<p>Cause:</p> <ul style="list-style-type: none"> * The submitted data is not in the correct format for the identified item(s). <p>Action:</p> <ul style="list-style-type: none"> * Make appropriate corrections to the record and resubmit. * Refer to the LTC RAI User's Manual for item-by-item instructions for the MDS * Refer to the current data specifications for this item to determine acceptable values.

Table 1-4. Fatal Record Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-40	Inconsistent dates: The dates identified are not consistent with each other.	<p>Cause:</p> <ul style="list-style-type: none"> * The identified dates are inconsistent with each other. * A4a (date of re-entry) must be later than AB1 (admission date). If AB1 is later than A4a, the record will be rejected. * P_REC_DT (previous record date) must be later than AB1 (admission date). If AB1 is later than P_REC_DT, the record will be rejected. * A3a (assessment reference date) must be later than or the same as A4a (date of reentry). If A3a is earlier than A4a, the record will be rejected. * VB2 (RAP completion date) must be later than or the same as R2b (MDS completion date). If VB2 is earlier than R2b, the record will be rejected. <p>Definition:</p> <ul style="list-style-type: none"> * P_REC_DT (previous record date) occurs in significant correction assessments. P_REC_DT is the A3a (assessment reference date) of the record that is being corrected. <p>Tip:</p> <ul style="list-style-type: none"> * Check the Field identified and the Invalid Data on the Final Validation Report to determine the date items that are inconsistent. * P_REC_DT is an item that may not be visible to the facility user. It may be an item that is filled in by the vendor software when the record is copied to an upload file. <p>Action:</p> <ul style="list-style-type: none"> * Contact your software vendor to determine how your software handles P_REC_DT. * Make appropriate corrections to the record and resubmit. * Refer to the LTC RAI User's Manual for item-by-item instructions for the MDS. * Refer to the current data specifications for this item to determine acceptable values.

Table 1-4. Fatal Record Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-50	Inconsistent REC_TYPE/AA8a,AA8b: The submitted record type (REC_TYPE) is inconsistent with the submitted reason for assessment (AA8a, AA8b). Contact your software vendor.	<p>Cause:</p> <ul style="list-style-type: none"> * The submitted REC_TYPE (record type) does not match the submitted data combination for AA8a (primary reason for assessment) and AA8b (special assessment code) or the data in AT2 (correction action requested). <p>Definition:</p> <ul style="list-style-type: none"> * REC_TYPE is based on the "Reasons for Assessment" items (AA8a and AA8b) and the correction "Correction Action Requested" item (AT2). There are 15 different data record types. This field indicates to the computer the fields that are required for the record submitted. <p>Tip:</p> <ul style="list-style-type: none"> * With most encoding software, the REC_TYPE is inserted in each data record by the software when a file is created. <p>Example:</p> <ul style="list-style-type: none"> * If AA8a = 01, REC_TYPE is "A". * If AA8a = 02, REC_TYPE is "Y". * If AA8a = 05 and AA8b = 2, REC_TYPE is "QM". * If AT2 = 2, REC_TYPE is "X". <p>Action:</p> <ul style="list-style-type: none"> * Correct using the MDS Correction policy. * Contact your software vendor for assistance. * Refer to the record type definition matrix in the data specifications.
-51	AB2 value is missing: The AB2 field is blank and should not be. The AB2 value must not be blank on admission records or discharge prior to completion of initial assessment record (AA8a = 01 or 08)	<p>Cause:</p> <ul style="list-style-type: none"> * The AB2 value (admission from at entry) must not be blank on admission records (AA8a=01) or discharge prior to completion of initial assessment records (AA8a=08) <p>Action:</p> <ul style="list-style-type: none"> * Make appropriate corrections to the record and resubmit. * Refer to the LTC RAI User's Manual for item-by-item instructions for the MDS * Refer to the current data specifications for this item to determine acceptable values.

Table 1-4, Fatal Record Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-52	Inconsistent AB8a value: The submitted data in item AB8a is not consistent with the data in item AB8b.	<p>Cause:</p> <ul style="list-style-type: none"> * IF AB8a (language) equal 3 (language—other), THEN AB8b (description of language) must specify the “other” language. * IF AB8a (language) equals 0, 1, or 2, THEN AB8b (description of language) must be blank. <p>Action:</p> <ul style="list-style-type: none"> * Make appropriate corrections to the record and resubmit. * Refer to the LTC RAI User’s Manual for item-by-item instructions for the MDS. * Refer to the current data specifications for this item to determine acceptable values.
-53	Inconsistent AB10 value: The submitted data in item AB10a is not consistent with the data in items AB10b through AB10f.	<p>Cause:</p> <ul style="list-style-type: none"> * IF AB10a (not applicable-No MR/DD) is checked, THEN all of AB10b through AB10f (MR/DD with organic condition) must be blank. * IF AB10a is not check, THEN at least one of AB10b through AB10f must be checked. * IF AB10a is a dash, THEN AB10b through AB10f must consist of at least one dash and the rest blank. <p>Tip:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> A checked response will display as a “1” on the validation report. <input type="checkbox"/> A blank response (unchecked) will display as a “0” on the validation report. <p>Action:</p> <ul style="list-style-type: none"> * Make appropriate corrections to the record and resubmit. * Refer to the LTC RAI User’s Manual for item-by-item instructions for the MDS * Refer to the current data specifications for this item to determine acceptable values.

Table 1-4. Fatal Record Messages (cont’d)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-54	Inconsistent B1 value: The submitted data in item B1 is not consistent with the data in items B2 through F3 and N2 through N5.	<p>Cause:</p> <ul style="list-style-type: none"> * IF B1 (comatose) equals 1, THEN the following items must be blank: <ul style="list-style-type: none"> * B2 through F3 (cognitive patterns, communications/hearing patterns, vision patterns, mood and behavior patterns, and psycho social well being) * N2 through N5 (activity pursuit patterns) * IF B1 equals 0 (zero) or a dash, THEN the following items must not be blank: <ul style="list-style-type: none"> * B2 through F3 * N2 through N5 <p>Tip:</p> <ul style="list-style-type: none"> * This is a skip pattern. If B1 equals 1, then skip to Section G. Submit the new file. * Contact your software vendor for assistance.

Table 1-4. Fatal Record Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-395	Invalid AA8b/SUB_REQ: If AA8b=1,2,3,4,5,7,or 8, then SUB_REQ must be 3. PPS assessments cannot be performed on a non-certified unit.	<p>Cause:</p> <p>*The assessment submitted is encoded in AA8b as a 1,2,3,4,5,7, or 8. This reason for assessment is only used for PPS assessments.</p> <p>Definition:</p> <p>*The Facility cannot release resident information without appropriate authority. There must be federal and/or State authority in order for a facility to submit MDS information to the standard MDS system. The key to what authority exists is based on certified versus non-certified units.</p> <p>Tip:</p> <p>*PPS assessments are not performed on a non-certified unit.</p> <p>*For detailed information re: SUB_REQ values, refer to the LTC Resident Assessment Instrument, Version 2.0, Provider Instructions Regarding Authority To Submit MDS Records and Use of the SUB_REQ Field.</p> <p>Action:</p> <p>*Check to make sure you have entered the reason for assessment, AA8b correctly.</p> <p>*If AA8b is to be 1,2,3,4,5,7, or 8, then the SUB_REQ must be a 3 for this assessment.</p> <p>*If AA8b is not 1,2,3,4,5,7, or 8 then refer to the manual entitled Provider Instructions Regarding Authority to Submit MDS Records and Use of the SUB_REQ Field for the correct SUB_REQ value.</p>

Table 1-4. Fatal Record Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-396	Invalid SUB_REQ: The SUB_REQ in the modification/inactivation record submitted does not match the SUB_REQ of the prior record. Correction of SUB_REQ requires a manual request to your state.	<p>Cause:</p> <ul style="list-style-type: none"> *The SUB_REQ submitted in the modification/inactivation record does not exactly match the SUB_REQ that was in the original record. <p>Definition:</p> <ul style="list-style-type: none"> *The value of SUB_REQ on a modification or inactivation record must exactly match the value for the prior record to be corrected. A modification or inactivation request submitted to the State that changes the SUB_REQ will be rejected. <p>Tip:</p> <ul style="list-style-type: none"> *Example: IF the SUB_REQ in the original record that was accepted in the State database is equal to 3 then the submitted modification/inactivation of this record must have a SUB_REQ=3. *For detailed information re: SUB_REQ values, refer to the LTC Resident Assessment Instrument, Version 2.0, Provider Instructions Regarding Authority To Submit MDS Records and Use of the SUB_REQ Field manual. <p>Action:</p> <ul style="list-style-type: none"> *Verify that the SUB_REQ value on the modification/inactivation record matches the original record in the database. *Make appropriate corrections to the record and resubmit *If the SUB_REQ value is incorrect on a record already accepted into the State MDS database, you must make a written request to the State help desk. *Refer to the LTC Resident Assessment Instrument, Version 2.0, Provider Instructions Regarding Authority To Submit MDS Records and Use of the SUB_REQ Field manual.
-400	W2a value is missing: The W2a Field is blank and should not be. The W2a value must not be blank for assessments with an A3a (Target Date) or R4 (Discharge Date) from October 1 through June 30.	<p>Cause:</p> <ul style="list-style-type: none"> • W2a cannot be blank on assessments with an A3a (Target Date) or R4 (Discharge Date) between October 1 and June 30 beginning on October 1, 2005. <p>Definition:</p> <ul style="list-style-type: none"> • W2a - Did the resident receive the Influenza vaccine in this facility for this year's Influenza season (October 1 through March 31)? 0 - No 1- Yes <p>Action:</p> <ul style="list-style-type: none"> • Make appropriate corrections to the record and resubmit. • Refer to the LTC RAI User's Manual for item-by-item instructions for the MDS. • Refer to the current data specifications for this item to determine acceptable values.

Table 1-5. Warning Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-65	Inconsistent AB1 date: The submitted date in AB1 is not consistent with the AB1 date previously submitted.	<p>Cause:</p> <ul style="list-style-type: none"> * When submitted optionally on any non-admission record, AB1 (date of entry) must be the same as the AB1 submitted on the admission assessment for the same stay. <p>Definition:</p> <ul style="list-style-type: none"> * Stay: This is the period of time a resident is at a facility from the day of admission to the day of discharge where return is not anticipated. A discharge coded AA8a = 06 ends a stay. A discharge coded AA8a = 08 ends a stay if the facility does not expect the resident to return. With either of these discharges the facility must complete a new admission assessment (AA8a = 01). In these cases, the resident must have a new AB1 (date of entry) if they return to the facility. * Face sheet items (Sections AB and AC) follow the "all or none" rule. * "All or none" rule pertains to face sheet Sections AB and AC as follows: <ul style="list-style-type: none"> * IF AA8a = 01, all items AB1 through AC1y must be completed with valid values. * IF AA8a = 08, AB1 and AB2 must be completed. Items AB3 through AC1y are optional. However, if any of those items are submitted optionally, then all items must be completed with valid values. * IF AA8a = any value other than 01 or 08, items AB1 through AC1y are optional. However, if any of those items are submitted optionally, then all items must be completed with valid values. <p>Action:</p> <ul style="list-style-type: none"> * Correct using the MDS Correction policy. * Refer to the LTC RAI User's Manual for item-by-item instructions for the MDS. * Refer to the current data specifications to determine valid values.

Table 1-5. Warning Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-66	Inconsistent AB2 value: The submitted value in AB2 is not consistent with the AB2 value previously submitted.	<p>Cause:</p> <ul style="list-style-type: none"> * When submitted optionally on any non-admission record, AB2 (admitted from) must be the same as the AB2 submitted on the admission assessment for the same stay. <p>Definition:</p> <ul style="list-style-type: none"> * Stay: This is the period of time a resident is at a facility from the day of admission to the day of discharge where return is not anticipated. A discharge coded AA8a = 06 ends a stay. A discharge coded AA8a = 08 ends a stay if the facility does not expect the resident to return. With either of these discharges the facility must complete a new admission assessment (AA8a = 01). The resident must have a new AB2 (admitted from) value if they return to the facility at a later date. * Face sheet items (Sections AB and AC) follow the "all or none" rule. * "All or none" rule pertains to face sheet Sections AB and AC as follows: <ul style="list-style-type: none"> * IF AA8a = 01, all items AB1 through AC1y must be completed with valid values. * IF AA8a = 08, AB1 and AB2 must be completed. Items AB3 through AC1y are optional. However, if any of those items are submitted optionally, then all items must be completed with valid values. * IF AA8a = any value other than 01 or 08, items AB1 through AC1y are optional. However, if any of those items are submitted optionally, then all items must be completed with valid values. <p>Action:</p> <ul style="list-style-type: none"> * Correct using the MDS Correction policy. * Refer to the LTC RAI User's Manual for item-by-item instructions for the MDS. * Refer to the current data specifications to determine valid values.
-70	Assessment completed late: The submitted R2b date was > 92 days after the R2b date submitted previously.	<p>Cause:</p> <ul style="list-style-type: none"> * The completed assessment was not within CMS timing guidelines. * There should be no more than 92 days from R2b to R2b date (date the RN signed the assessment as being complete) for any two OBRA assessments. <p>Tip:</p> <ul style="list-style-type: none"> * Medicare PPS only (OM) assessments are not included in the CMS timing guidelines. OM record types are not considered for timing edits. * Timing Edits are not done on records with a SUB_REQ=2. * For records where SUB_REQ=3 the previous record for timing must have a SUB_REQ=3 or 0 (zero). Timing edits will not be done between any two records where the SUB_REQ is not the same or 0 (zero). <p>Action:</p> <ul style="list-style-type: none"> * No action is required for this submission. * To avoid this in the future, review the assessment schedule and verify that all assessments are completed in a timely manner.

Table 1-5. Warning Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-71	Inconsistent record sequence: The submitted reason for assessment (AA8a/AA8b) does not logically follow the reason for assessment (AA8a/AA8b) previously submitted.	<p>Cause:</p> <ul style="list-style-type: none"> * The record submitted does not satisfy the CMS sequence guidelines. * Facility may have missed submitting the record. * The resident's identifying information may not have matched on a previous record submitted and a new row on the resident table may have been created on the CMS MDS system at the State for that record causing a failure in the sequencing order. <p>Definition:</p> <ul style="list-style-type: none"> * Row on the resident table: Each person with data in the database has a row on the resident table in the CMS MDS system at the State. This row contains the person's identifying information and is used to link subsequent records for that person as they are submitted. If the data submitted for a resident does not match a row, a new row is created, thereby making a new person in the database that the record was linked to. <p>Example:</p> <ul style="list-style-type: none"> * The initial record for a resident in a facility should be one of the following: * Admission record (AA8a = 01) * Discharge prior to completing the initial assessment (AA8a = 08) * Medicare 5 day not combined with the admission assessment (AA8a = 00 and AA8b = 1). * A reentry record should not follow an admission assessment record. Reentry records should only follow discharge records. <p>Tip:</p> <ul style="list-style-type: none"> * When more than one record for the same resident is submitted in the same test file, this sequence edit will only compare those records in the file with records previously submitted to the database. The ones in the file will not be sequenced with each other. Therefore, sequence warnings may appear on the final validation report for a production file but the same file as a test file may not have resulted in the sequence warnings. * Sequencing edits are not done on records with a SUB_REQ=2. * For records where the SUB_REQ=3, the previous record for sequencing edits must have a SUB_REQ=3 or 0 (zero). Sequencing edits will not be done between any two records where the SUB_REQ is not the same or 0 (zero). <p>Action:</p> <ul style="list-style-type: none"> * There are a limited number of exceptions to the sequence guidelines. If you are certain this record is correct due to an exception, no action is needed. * If this message occurred because a record was completed and not submitted, submit the missing record now. * If after reviewing activity reports, roster reports and/or QI reports you believe a new resident may have been created in error, contact your State MDS Coordinator. * Review activity reports, roster reports and/or QI reports to assure that all records are submitted timely.

Table 1-5. Warning Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-72	Inconsistent submission sequence: Records appear to have been submitted out of order. The dates in the submitted record do not sequentially follow the dates of the previous record.	<p>Cause:</p> <ul style="list-style-type: none"> * The date of the record submitted precedes the date of the most current record in the State system. This indicates that records were not submitted in the order they were completed. * The dates used for determining the submission order are: <ul style="list-style-type: none"> * R2b (MDS Completion date) * R4 (Discharge date) * A4a (Reentry date) <p>Tip:</p> <ul style="list-style-type: none"> * Records cannot be backdated. When a record is missed and completed late, it must not be backdated to the date it was actually due. <p>Action:</p> <ul style="list-style-type: none"> * Check final validation reports, roster reports and activity reports to assure that all records are submitted timely.
-74	An ICD-9 code submitted in I3 caused the Dehydration RAP - VA14A to be triggered; however, this was not indicated in the submission file.	<p>Cause:</p> <ul style="list-style-type: none"> * The submitted record did not show the Dehydration RAP (VA14a) as triggered. However, the ICD-9 code submitted in I3 a-e resulted in state database triggering the Dehydration RAP <p>Tip:</p> <ul style="list-style-type: none"> * An ICD-9 diagnosis of 276.5, 276.50, 276.51 or 276.52 in I3 a-e will cause the dehydration RAP to trigger. <p>Action:</p> <ul style="list-style-type: none"> * Verify that the ICD-9 diagnosis codes in I3 a-e are accurate. * If necessary correct using the MDS Correction policy.
-81	Resident information updated: Submitted data in the above field is not the same as the data previously submitted for this resident. Verify that the new information is correct.	<p>Cause:</p> <ul style="list-style-type: none"> * If resident information in this record is similar enough to resident information on the State database based on a set of resident matching criteria, a match occurs and certain fields on the resident table in the State database will be updated. * Patient's first name was spelled differently, the birth date was entered incorrectly, or the facility may be submitting information that was unknown previously (such as the Medicare or Medicaid number). <p>Definition:</p> <ul style="list-style-type: none"> * Resident matching criteria: Resident identifying information is checked against the resident table on the CMS MDS system at the State. If a match is found, the fields identified in the tip below are checked for matches and are updated if they do not match. <p>Tip:</p> <ul style="list-style-type: none"> * Fields that may be updated are resident last name, first name, middle initial, birth date, death date, social security number (SSN), Medicare number, Medicaid number and gender. * Refer to the LTC Facility User Guide for the Resident Matching Criteria table. <p>Action:</p> <ul style="list-style-type: none"> * Verify the data displayed as old and new. * If the new data is correct, no action is required. * If the new data is not correct, correct using the MDS Correction policy.

Table 1-5. Warning Messages (cont'd)

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-82	Resident provider updated: This resident was previously cared for by the 'prior' provider identified above.	<p>Cause:</p> <ul style="list-style-type: none"> * Occurs when the resident is in the database under one facility and now is in a different facility. The current facility ID will be updated in the State database. <p>Definition:</p> <ul style="list-style-type: none"> * The current facility ID is the unique State assigned Facility ID (Facid) . <p>Tip:</p> <ul style="list-style-type: none"> * "Old" is the previous MDS or HHA facility, the 'prior' provider. * "New" is the current facility this assessment was submitted for, the current provider. <p>Action:</p> <ul style="list-style-type: none"> * No action needed.
-216	R2b date late: The submitted assessment completion date (R2b) was more than 14 days later than the date of entry (AB1), or reentry date (A4a) whichever is later.	<p>Cause:</p> <ul style="list-style-type: none"> * The admission assessment was completed late. * For an admission assessment (AA8a = 01), R2b (date RN coordinator signed assessment as complete) should be no more than 14 days later than AB1 (date of entry) or A4a (reentry table), whichever one is later. <p>Tip:</p> <ul style="list-style-type: none"> * This message will only occur on admission assessments where AA8a = 01. <p>Action:</p> <ul style="list-style-type: none"> * No action is required for this assessment. * To avoid this message in the future, schedule admission assessments so that they are completed within 14 days of admission or of readmission if the admission assessment was not completed before the discharge that preceded the readmission.
-217	VB2 date late: The submitted RAP assessment process completion date (VB2) was more than 14 days later than the date of entry (AB1), or reentry date (A4a) whichever is later.	<p>Cause:</p> <ul style="list-style-type: none"> * The admission assessment was completed late. * For an admission assessment (AA8a = 01), VB2 (RAP assessment signature date) should be no more than 14 days later than AB1 (date of entry) or A4a (reentry date), whichever one is later. <p>Tip:</p> <ul style="list-style-type: none"> * This message will only occur on admission assessments where AA8a = 01. <p>Action:</p> <ul style="list-style-type: none"> * No action is required for this assessment. * To avoid this message in the future, schedule admission assessments so that they are completed within 14 days of admission or readmission if the admission assessment was not completed before the discharge that preceded the readmission.

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-224	A3a should be no more than 21 days earlier than VB4 date.	A3a (last day of MDS observation period) should be no more than 21 days earlier than VB4 date (RAP care plan signature date).
-225	A3a should be no more than 28 days earlier than CARE_LCK date.	A3a (last day of MDS observation period) should be no more than 28 days earlier than CARE_LCK date (the date that all sections of the MDS record and care planning decisions are completed).
-227	R2b should be no more than 21 days earlier than ASMT_LCK date.	R2b (date the RN coordinator signed the assessment as complete) should be no more than 21 days earlier than the ASMT_LCK date (the date that all Sections A through V except for the care planning items are completed).
-228	VB4 date late: The submitted care plan decision completion date (VB4) was more than 21 days later than the assessment completion date (R2b)	R2b (date the RN coordinator signed the assessment as complete) should be no more than 21 days earlier than VB4 date (RAP care plan signature date).
-229	R2b should be no more than 28 days earlier than CARE_LCK date.	R2b (date the RN coordinator signed the assessment as complete) should be no more than 28 days earlier than the CARE_LCK date (the date that all sections of the MDS record and care planning decisions are completed).
-231	VB2 should be no more than 7 days earlier than VB4 date.	VB2 (RAP assessment signature date) should be no more than 7 days earlier than VB4 date (RAP care plan signature date).
-232	VB2 should be no more than 14 days earlier than CARE_LCK date.	VB2 (RAP assessment signature date) should be no more than 14 days earlier than the CARE_LCK date (the date that all sections of the MDS record and care planning decisions are completed.)
-233	VB4 date late: The submitted care plan decision completion date (VB4) was more than 21 days later than the assessment reference date (A3a).	<p>Cause:</p> <ul style="list-style-type: none"> * The care plan decision date (VB4) exceeds the allowable time limit for the assessment reference date (A3a). * VB4 (RAP care plan signature date) should be no more than 21 days after A3a date (last day of MDS observation period). <p>Action:</p> <ul style="list-style-type: none"> * No action is required for this assessment * To avoid this message in the future, schedule assessment so that the care plan decisions are completed no later than 21 days after the assessment reference date (A3a).
-235	VB4 should be no more than 7 days earlier than CARE_LCK date.	VB4 (RAP care plan signature date) should be no more than 7 days earlier than the CARE_LCK date (the date that all sections of the MDS record and care planning decisions are completed).
-301	Invalid RUGs program name: The State database RUGs program name is incorrectly configured. Contact your State Coordinator.	<p>Cause:</p> <ul style="list-style-type: none"> * There is a problem at the CMS MDS system at the State. * The program specified by the State Administrator in the Data Management Software on the Configurable Items window is invalid or does not exist. <p>Action:</p> <ul style="list-style-type: none"> * The facility staff should contact the State MDS Coordinator to verify their entries in the RUG's option table. * Correct using the MDS Correction policy.

Table 1-6 MDS Inactive Messages

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-304	AA8b column is null.	The required AA8b field for this assessment is null. RUGs cannot be calculated.
-313	Missing face sheet data: If any item(s) is/are filled out on the face sheet (Sections AB and AC), all required items must be completed with valid data.	If AA8a = 01, all face sheet items must be submitted (Sections AB and AC). If AA8a = 08, this message does not apply as only AB1 and AB2 are required. If any items in Sections AB and AC are optionally submitted on any other record, all items must be submitted.

Table 1-6 MDS Inactive Messages

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-302	Assessment_internal_id is null.	A requested Assessment_internal_id was stored as a null value. The internal assessment ID is assigned by the MDS system when the assessment is submitted.
-305	Assessment_internal_id requested was not found on assessment table.	The requested Assessment_internal_id could not be found on the Assessment table. The internal assessment ID is assigned by the MDS system when the assessment is submitted.
-312	Section_A record not found.	The Assessment_internal_id that was submitted to the RUGs calculation program does not contain data values in Section A of the assessment record. The internal assessment ID is assigned by the MDS system when the assessment is submitted.

Table 1-7. MDS Messages for Internal Programmer Use

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-315	Invalid value for Section_S fields.	<p>Cause:</p> <ul style="list-style-type: none"> * The submitted data for this item is not in the valid range of acceptable values. <p>Action:</p> <ul style="list-style-type: none"> * Refer to your State's current Section S data specifications for this item to determine the acceptable values.
-316	Incorrect format for Section_S fields.	<p>Cause:</p> <ul style="list-style-type: none"> * The submitted data is not in the correct format for the identified item. <p>Action:</p> <ul style="list-style-type: none"> * Refer to your State's current Section S data specifications for this item to determine acceptable format.
-317	Date in Section_S is missing or invalid.	<p>Cause:</p> <ul style="list-style-type: none"> * Date item identified is missing or contains an invalid date. <p>Definition:</p> <ul style="list-style-type: none"> * Invalid for the purposes of this message means that the date must contain a valid month, day, and year. <p>Tip:</p> <ul style="list-style-type: none"> * Check the Field identified on the Final Validation Report to determine the date item that is missing or invalid. * The correct submission file format for all dates is YYYYMMDD. The date submitted will display on the Final Validation Report the way it is in the submission file. If it is submitted in the file as MMDDYYYY, it will be displayed this way on the Final Validation Report, indicating the reason for the message. This may mean your software vendor needs notified. <p>Example:</p> <ul style="list-style-type: none"> * An invalid date would be June 32, 1999. * A month of 40 or a day of 32 is not valid. <p>Action:</p> <ul style="list-style-type: none"> * Refer to your State's current Section S data specifications to determine valid values.

Table 1-8. MDS Warning Messages, Section S

MESSAGE NUMBER	MESSAGE	MESSAGE DESCRIPTION
-318	Date in Section_S is greater than submission date.	<p>Cause:</p> <ul style="list-style-type: none"> * The date item identified is a future date (later than the current date). The date item must precede or be the same as the current date. <p>Definition:</p> <ul style="list-style-type: none"> * Current date refers to the date the file is submitted to the CMS MDS system at the State. <p>Tip:</p> <ul style="list-style-type: none"> * Check the Field identified on the Final Validation Report to determine the date item that contains a future date. * The correct submission file format for all dates is YYYYMMDD. The date submitted will display on the Final Validation Report the way it is in the submission file. If it is submitted in the file as MMDDYYYY, it will be displayed this way on the Final Validation Report, indicating the reason for the message. This may mean your software vendor needs notified. <p>Action:</p> <ul style="list-style-type: none"> * Refer to your state's current Section S data specifications to determine valid values.
-319	Date in Section_S is more than 140 years in the past.	<p>Cause:</p> <ul style="list-style-type: none"> * Any record is rejected if the date item identified is more than 140 years prior to the current date. <p>Definition:</p> <ul style="list-style-type: none"> * Current date refers to the date the file is submitted to the CMS MDS system at the State. <p>Tip:</p> <ul style="list-style-type: none"> * Check the Field identified on the Final Validation Report to determine the date item that is more than 140 years prior to the current date. * The correct submission file format for all dates is YYYYMMDD.
